

Protect Press Freedom #ProtectJulian

Wikileaks founder and political asylee, Julian Assange, was dragged out of the Ecuadorian embassy in London on April 11 and arrested.

On the same day Ecuador received a **\$4.2 billion IMF loan** in exchange for stripping him of his asylum and handing him over to British authorities.

President Moreno has met with US Vice President Pence and has shifted Ecuador's policies dramatically towards American influences desecrating **hard-fought-for asylum laws** in the process.

Nine years without freedom, fearing **extradition to the US**, Julian has been secluded in the embassy seven years without access to sunlight, fresh air or medical care despite British doctors requesting **urgent hospital care** years ago.

For the last year this award-winning journalist was gagged and isolated in effective solitary despite **two UN rulings that he must be immediately freed and compensated**. The US, UK & Australia are flagrantly disobeying legally-binding international laws.

Julian Assange, Wikileaks' Editor, has a 100% **flawless publishing** record, releasing evidence of **war crimes**, human rights abuses, environmental abuses, spying & corruption for over **11 years without a single retraction**. Wikileaks are non-partisan & publish accurate verified source documents including some **800,000 documents on Russia!** An estimated **20,000 court cases** made use of their publications.

Julian is a **2019 Nobel Peace Prize Nominee** and **international award-winning journalist**. His arrest is meant to send a message to journalists: **Be quiet. Behave. Toe the line, or you will pay the price.**

Imagine the precedent this case will set for Free Press. Will the Saudi Arabian government also be able to extradite a FOREIGN journalist and have them subject to THEIR draconian laws just because they disliked their truthful publications?
